PROFILE

With over 6 years of experience in the tech industry, I specialize in React-Native, ReactJS, Nest.js, and am proficient with REST, GraphQL, and serverless technologies. My background includes developing diverse web and mobile applications and leading projects from inception to delivery, often in the challenging and dynamic environment of startups. I have consistently enjoyed and thrived in these energetic settings, adept at cross-functional collaboration and driven to create impactful solutions in the tech sector.

WORKING EXPERIENCE

Apr 2023 - Current	Freelancer	
Sep 2021 - Oct 2022	BOOKBAND	Technical Lead
Jun 2021 - Sep 2021	SOOMGO	Mobile developer
Jan 2021 - Jun 2021	CAREDOC	Mobile developer
May 2020 - Sep 2020	DOOBOOLAB	Frontend developer
Jan 2020 - Apr 2020	CHANNEL.IO	Frontend developer
Jun 2018 - Dec 2019	KCHAIN	Fullstack developer
Apr 2017 - May 2018	MCST	Backend developer

PROJECTS

2023	Travel Expense Application	ZOOP
	React-native, Realm, Firebase	
	<ul style="list-style-type: none">• Developed and operated ZOOP, a mobile service for travel expense accounting, launching on both iOS and Android platforms.• Achieved an average of 50 active daily users and over 10 new installations per day without any marketing, reaching a total of 1,000 downloads.• Designed the service to operate without any operational costs by utilizing Realm, Serverless, and Google Spread Sheet: Current operational cost is 0 EUR.	
2023	Multi-Brand App Build Setup	Freelancer, Full-time
	React-native	
	Ensured identical functionality across apps for 3 brands while allowing	

customization of unique brand-specific themes.

2023

Ship Modeling Management System

Project-Based Contractor

Vue.js, Docker, AWS EC2

- Acted as Project Manager and implemented frontend development for the cabin modeling management system.
- Configured integrated deployment of web and server on AWS EC2 using Docker.

2022

P2P Book Sharing System

BOOKBAND

React-native, React.js, Relay

- As technical lead, I led the design and implementation of Bookband, a service for sharing books in surplus space, launching on iOS and Android.
- Processed approximately 8,000 book data from national book systems and web crawling for operational needs.
- I developed the PWA kiosk module to enable easy installation, configuration, updates, and maintenance.

2022

Server Cost Reduction

BOOKBAND

Nest.js, AWS Lambda

Migrated a Nest.js application deployed on EC2 to Lambda, reducing monthly expenses by 70%.

2021

Design System and Monorepo Transition

CAREDOC

React-native

- For Caredoc, a caregiver matching service, transitioned from a multi-repo to a monorepo as a React-native developer.
- Conducted a migration to a new design system, including research, establishment of design tokens, definition and implementation of key components, and integration of analytics tools.

2020

Expo-relay-boilerplate

DOOBOLAB

React-native, Expo, Relay

Developed an open-source boilerplate project to facilitate integration of Relay GraphQL client with React-native and understanding of Concurrent and Suspense features.

2019

Blockchain services

KCHAIN

React-native, Expo, React.js, Django

- Set up and managed an EOS blockchain node on a cloud server, handling tasks

related to EOS-based token issuance and distribution.

- Developed a webkit for EOS blockchain wallet creation, token transfer, and contract writing, based on React and Django.
- Developed the TokenRocket application for token airdrops, achieving partnerships with 30 companies and a cumulative subscriber count of 1,700.

EDUCATION

Aug 2016 - Mar 2017	Java Full-Stack Development Practical Training Program	State-sponsored
Mar 2009 - Jan 2013	Bachelor of Mechanical Engineering	Inha University
